Adobe Creative Suite 4 - Premium,.Q: Rearranging the picture Problem You have a piece of paper containing some symbols and numbers. There are a total of 4 symbols  $\rightarrow$ ,  $\triangleleft$ ,  $\rightarrow$ ,  $\$$ ,  $\uparrow$  The paper represents a map from the square  $[0,1]^2$  to itself. What are the most operations you can perform on the paper to transform it into another paper, such that: The original paper has the same final shape as the new paper. The new paper represents a proper map from the square  $[0,1]^2$  to itself. If you were not allowed to flip the paper, you could cut the paper into quarters. Then you are allowed to rotate each quarter by  $90^\circ$ . Examples These are two possible variants of the original map: (The symbols have no significance in this context.) You can
